

Dashcams, model A5

# A5 Dual-Lens Dashcam

## 2K front and 720p rear 4G dashcam with GPS and a 3-inch screen

The A5 is a dual-lens 4G dashcam with a 3-inch IPS screen. It records the road in 2K (2560 × 1440) at 25 fps through a 140° lens and the rear in 720p through a 130° lens. It has GPS and BeiDou, Wi-Fi, two-way voice, parking monitoring and takes microSD cards up to 512 GB.

### Front 2K, rear 720p

2560 × 1440 through a 140° lens ahead and 1280 × 720 through a 130° lens behind, both at 25 fps.

### GPS with route playback

Live tracking plus route history, matched to the recorded video.

### 3-inch IPS screen

Check both camera views and the settings on the device.

### About 110 hours on 512 GB

Both cameras recording at the standard 7 Mbps and 3 Mbps.

## Video

|              |                                                      |
|--------------|------------------------------------------------------|
| Cameras      | 2 (front and rear)                                   |
| Front camera | 2K (2560 × 1440) at 25 fps, 140°, F2.0 lens with WDR |
| Rear camera  | AHD 720p (1280 × 720) at 25 fps, 130°                |
| Codec        | H.264 (TS)                                           |
| Display      | 3-inch IPS, 640 × 360                                |

## AI safety

|                   |                             |
|-------------------|-----------------------------|
| ADAS, DMS and BSD | Not available on this model |
|-------------------|-----------------------------|

## Connectivity

|             |                                                  |
|-------------|--------------------------------------------------|
| Network     | 4G LTE Cat 1, Wi-Fi 2.4 GHz with hotspot         |
| 4G bands    | FDD B1/3/5/8, TDD B38/39/40/41; 3G WCDMA B1/5/8  |
| Positioning | GPS and BeiDou, external antenna; route playback |
| Voice       | Two-way voice communication                      |
| Updates     | From the card or over the air                    |

## Storage

|             |                                                                                       |
|-------------|---------------------------------------------------------------------------------------|
| Memory card | microSD up to 512 GB, Class 10 or faster                                              |
| Recording   | Loop recording in 1, 3 or 5 minute files; 24-hour parking monitoring; 3-axis G-sensor |

## Power & build

|                       |                                                    |
|-----------------------|----------------------------------------------------|
| Power input           | 5 V Type-C; supplied cable takes 12–24 V; ACC line |
| Built-in battery      | 180 mAh, 3.7 V; too small to record while parked   |
| Operating temperature | -20 °C to +70 °C                                   |
| Audio                 | Built-in microphone and speaker                    |
| Controls              | 7 keys and reset                                   |
